

ULISES LEGARRETA

Tijuana, BC México

SUMMARY

I am a front end developer with 10+ years experience working with private companies and public institutions to meet and exceed their goals.

I have overseen and developed responsive websites for a wide variety of clients ranging from telecommunication companies to local artists and creators. I am also experienced in many areas of web development and project management.

I believe that modern web design should be an intense collaboration between designers and developers, and this effort should be have the same underlining of creativity.

I am looking for the opportunity to work with a professional, dedicated and passionate team to create beautiful work.

I enjoy a challenge, and learning new things everyday.

I'm bilingual (english/spanish).

SKILLS

- HTML
- CSS3
- JavaScript, JQuery, currently learning Angular.js
- Experience with Scrum / Agile methodologies
- Experience with PHP
- Wordpress, Joomla, Liferay
- PhotoShop, Illustrator
- git

EXPERIENCE

CECUT – Exhibitions Department – Jan 2015/May 2015

Front-End Developer

I developed a fully responsive custom Wordpress theme working alongside their internal design department to produce not only the theme but also the documentation and training materials for the staff.

This project also required custom code to work along a plugin to handle custom fields as required by the client for their day to day content management.

Skills : HTML5, CSS3, Foundation framework, php, wordpress plugins, plugin configuration, javascript, git.
